Letter on forest products – to be signed by Canada

Dear ...

I have the honour to confirm the following understanding reached between the delegations of the European Union and Canada during the course of negotiations regarding the Comprehensive Economic and Trade Agreement (“CETA”) signed this day: _____

Canada and the European Union recognize the importance of the forestry sector to their economies and those of the rural communities of both Parties.

Through the CETA, Canada and the European Union have established conditions that will improve trade in forest products and support those that depend on this sector.

The CETA will establish conditions to improve trade in this sector, by comprehensively eliminating both Parties’ tariffs on forest products; providing for forums to discuss matters related to market access, including non-tariff measures, including among others a Bilateral Dialogue on Forest Products to discuss relevant laws, regulations, policies and sector issues of importance to the production, trade, and consumption of forest products.

In the context of liberalized trade for forest products, upon implementation of the CETA, notwithstanding the exception for the export of logs of all species from the application of Article 12 (Import and Export Restrictions) of the National Treatment and Market Access for Goods Chapter, the Government of Canada will issue permits upon request for exports of logs destined for the European Union.

I look forward to the strengthening of our historic commercial and economic ties between Canada and the European Union through the successful implementation of the CETA.

I have the honour to propose that this letter and your letter in reply confirming that the European Union shares this understanding will constitute an understanding between the European Union and Canada.

Sincerely,

LIMITED
